k. Description of Request: The licensee requests a temporary variance of the minimum flow requirements of the January 28, 2004 Order Amending License. The licensee states that water conditions in the Eel River basin are exceptionally dry, and requests that it be allowed to implement the “critical” and “exceptionally low inflow” minimum flow releases outlined in the January 28, 2004. Due to the urgent nature of this request and the potential immediate impacts to fishery resources, the Commission took action on the licensee’s proposal by order dated December 12, 2013. However, should basin water conditions require an extended variance, the Commission will take into account any comments received, intervention requests, and protests received in its analysis of a potential future variance request. Based on responses received to this notice, the Commission has also reserved the right to modify its December 12, 2013 order.

All comments, motions to intervene, or protests must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b).
